## SUMMARY

---

Software engineer with 10 years of experience building and modernizing SaaS products, including extensive PHP/Laravel work and 2+ years developing LLM-based and agentic systems. Hands-on product engineer experienced with user and administrator features, integrations, cloud infrastructure, and reliable delivery in small, fast-moving teams.

## SKILLS

---

Backend & Frontend: PHP, Laravel, JavaScript, TypeScript, React, Vue.js, Go, SQL, Livewire, Filament, REST APIs

AI & Engineering: Agentic workflows, OpenAI API, Anthropic API, Model Context Protocol (MCP), AI-assisted development, queues, event-driven systems, authentication

Cloud, Data & Quality: AWS, Docker, PostgreSQL, Redis, MySQL, GitHub Actions, CI/CD, Pest, PHPUnit, Playwright

## WORK EXPERIENCE

---

### Stanbridge University | Lead Engineer, Oct 2024–Present; Web Developer, May 2020–Oct 2024

- Lead and managed six engineers building and supporting a Laravel/Vue learning management platform used by thousands of students and faculty; own architecture, code reviews, sprint planning, mentorship, and stakeholder communication.
- Led an **AI Course Generator** that turns prompts into complete courses—including podcasts, videos, quizzes, and presentations; generated 1,000+ courses with 100% adoption among course-creation staff. This greatly reduced the time it takes to create a course from months to hours.
- Created an **agentic delivery pipeline** that implements tickets, runs QA, captures evidence, and opens pull requests for human review; increased throughput by 200%+ to 30–40 tickets per day.
- Reduced CI/CD runtime from 30 minutes to 5 minutes and introduced AI-ready code standards that improved output accuracy, security review, and debugging speed.

### ScorSync | Senior / Lead Engineer (Part-Time) | Dec 2024–Present | Remote

- Architected a Laravel, Livewire, and Filament scheduling workspace for gymnastics meets with up to 1,000 athletes, replacing error-prone spreadsheets and reducing preparation from two months to days.
- Developed administrator-facing imports, planning, bulk assignment, conflict detection, audit history, locking, and exports; containerized the application with Docker and modernized it for reliable AI-assisted development.

### Western Growers | Web Developer | Jan 2020–May 2020

- Maintained and modernized legacy PHP applications, improving performance, resolving critical production issues, and restructuring code for maintainability.

### Beyond Polish | Web Developer | Jul 2016–Dec 2019

- Built PHP, JavaScript, and MySQL tools for e-commerce analytics, reporting, and warehouse automation, increasing operational throughput by more than 500%.

## EDUCATION

---

University of California, Irvine — Full-Stack Web Development Certificate, 2016

## Achievements

---

Employee of the Year — Stanbridge University, 2022
